sample.

## Individual Particle analysis

Finding the right particle sizer is easy: Simply send us a sample of your choice – we will conduct a particle analysis and send you an individual analysis report and recommend an instrument suitable for your application. Please complete the form completely and **email it in advance to deoliveira@fritsch-france.fr and send us the material together with the print out of the completed form.** If you would like to send an additional sample (max. 2 samples) which differs in regards to consistency, desired sample quantity or deviating from the final fineness, please complete a second form for this second

The fields marked with an asterisk\* are required fields and have to be completed!

Your information about the material Name of the material*:								
Chemical formula:								
Hazardous material*: ('Please enclose safety data sheet!)	yes <sup>1</sup> no							
explosive toxic	caustic      oxidising      environmental hazard							
easily flammable	harmful to health from:							
Do not put in contact with:								
Material properties								
hygroscopic	pH-value:							
The material may be dried/heat	ed up to (in °C)							
Soluble in:								
Other:								
Which Particle Sizer shou	IId be utilized?							
Please select the suitable	e Particle Sizer for our requirements!							
ANALYSETTE 22 NeXT	Static Light Scattering							
How should the sample b	e measured?							
Please select the su	itable method for our application!							
Dry measurement –	approximately 200 – 500 $\text{cm}^3$ of sample material is required.							
Dispersion in	airflow							
Falling Chute								
Wet measurement -	approximately 5 – 10 cm <sup>3</sup> of sample material is required.							
Which measuring an	Which measuring and dispersion liquids do you recommend?							
Water								
Water / 0.1 %	6 tetra-sodium diphosphate (Na₄P₂O7)							
Water / surfac	ctant:							
Alcohols (e.g.	ethanol / 2-propanol):							
Benzine (e.g.	white spirit):							
Alkane (e.g. n	i-hexane):							
Our laboratory only suppl of solvents. For unusuals	lies a limited amount
